

PIONEERING SUSTAINABLE SOLUTIONS FOR THE CEMENT INDUSTRY

The Future Cement Initiative connects industry leaders, academia, and government stakeholders to drive sustainable innovations in cement manufacturing. Our mission is to develop cost-effective, scalable solutions that reduce environmental impact while enhancing economic performance.

OUR VISION

To improve the economic and environmental competitiveness of Saudi Arabia's cement industry, aligning with Vision 2030 and supporting the country's decarbonization goals by 2060.

Why Partner with The Future Cement Initiative?

- ✓ **Access Cutting-Edge Research:** Benefit from world-class laboratories and expertise at KAUST.
- ✓ **Collaborating on Strategic Projects:** Engage in projects focused on sustainability, efficiency, and innovation.
- ✓ **Drive Decarbonization Efforts:** Contribute to reducing CO₂ emissions and advancing low-carbon technologies.

Project Opportunities for Industrial Partners:

-  **Collaborative Technical Projects:** Waste heat recovery, sulfur management, emission mitigation, integration with renewables.
-  **Individual Technical Projects:** AI-driven failure prediction, technology assessments, material advancements.
-  **Innovative Blue-Sky Projects:** Next-generation cement materials, steam calcination, alternative fuels and carbon management.

JOIN US TODAY!

Become a key contributor
to the transformation of the
cement industry.
